

TRUCONNECT® REMOTE SERVICE

TRUCONNECT Modem Retrofit for CXT & S-series hoists

Get connected to your entire crane fleet

The TRUCONNECT Modem retrofit for Konecranes CTO Hoists has been designed to equip ControlPro (CID) or Masterpro (ECU) controlled hoists with all the necessary hardware needed for TRUCONNECT Remote Monitoring.

TRUCONNECT Remote Monitoring provides real-time crane condition, usage and operating information. Identifying anomalies, patterns and trends in the data assists making informed, component-specific predictions and to prioritize actions.

When combined with inspection and maintenance information provided by the maintenance program, Remote Monitoring data gives a comprehensive view of equipment maintenance needs and performance. Decisions to replace components are driven by a combination of preventive and predictive maintenance decisions.

All collected equipment usage, condition, operation and maintenance information is available on the yourKONECRANES customer portal. Safety alerts are sent via email and/or text message, allowing for prompt response.

BENEFITS

- Gives a comprehensive fleet view by allowing Controlpro (CID) and Masterpro (ECU) equipped assets to be added to the same remotely monitored fleet with assets
- Easy-to-follow instructions and complete hardware kit allow for quick installation
- Assists in further optimization of maintenance activities to reduce unplanned downtime and to improve equipment safety, productivity and lifecycle value
- Assists in making better informed, component-specific predictions and to prioritize corrective actions
- Assists in the planning and budgeting of component replacements, retrofits, overhauls, modernizations or outright replacements when needed
- No personal/privacy data is collected
